Building to Serve

Bulletin 2 – Update 30th January 2024)

New Timescales as far as CBC can estimate them to date.

As you will know from the occasional flurries of activity over recent months we have had to have a significant number of surveys undertaken and reports created. During our two recent Archaeological Surveys nothing of significant archaeological interest was discovered.

A Structural Engineer has used the ground survey for foundations calculation purposes. We have a number of other internal and external activities, including the trimming back of the trees along our border in conjunction with Castle House Trustees.

Four trees on or close to our rear boundary with Castlefields Park were felled in conjunction with the Town Council overseen by their Amenities, Conservation and Sustainability Manager. We have purchased eight trees to be planted in Castlefields Park.

Documentation covering our compliance with approval conditions has almost been completed. In parallel with the above structural building plans compliant with Building Regulations are getting close to completion.

Beyond this the following is estimated and could still be somewhat elastic:

Jan-Mar: Final Specifications for the building to be completed.

Mar-Apr: Tender completion for issue to prospective builders.

May: Receipt of tenders - selection of Tender and builder's timescales.

June/Jul: Possible commencement of demolition.

This information appears on our website and will be updated as we know more. www.calne-baptist.org.uk/redevelopment-plans--updates.html

Your sincerely, Stan Woods - Member of CBC Church Re-development Group
